

Supported Operating Systems

- iOS 11 (11.4.1)
- iOS 12 (12.1.4)

New Features

- Users can select multiple items to download.
- Users most recent searches will be remembered in the Scout and Search sections.

Updates

- FaceID login is available during the login process.

Bug Fixes

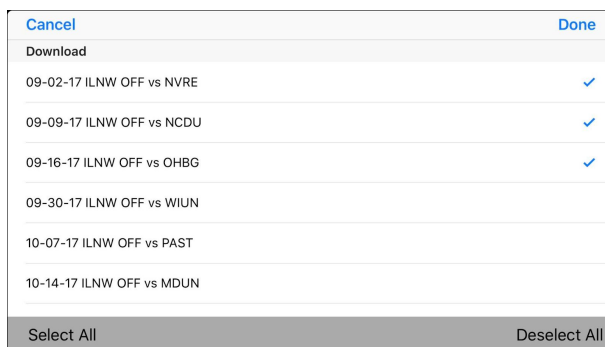

- We fixed a bug that caused the screen to go black when changing heading groups on an iPhone.

Known Issues

- Sound annotations have been disabled in Playbook due to a bug with the third-party control used.
- The ODK column will be removed in Imported media after a user sorts the column and closed the application.
- The Record feature crashes the app when users try to access the master created in the Imported media section.

Multi Item Download

- Users can select multiple masters or edits for download by tapping  icon.

Recent Searches

- Users most recent searches are remembered in the Scout and Search sections of the app.
- Tapping on a recent search will automatically load the criteria and run the search.
